PROFESSIONAL SUMMARY

- AI Engineer specializing in Generative AI, agentic AI systems, and full-stack product engineering, with hands-on experience designing and deploying production-ready AI applications.
- Built multimodal Retrieval Augmented Generation (RAG) platforms, autonomous multi-agent workflows, and evaluation-driven AI systems using Python, FastAPI, React, LangGraph, and modern LLM orchestration.
- Combines strong software engineering fundamentals with end-to-end product ownership to deliver scalable, reliable AI solutions from architecture through deployment.

EDUCATION

Jamia Hamdard

New Delhi, India

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.55/10

Sep 2022 - June 2026

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, DBMS

TECHNICAL SKILLS

- Languages:** Python, SQL, Javascript, HTML, CSS
- AI/ML & Generative AI:** Large Language Models (LLMs), Agentic AI, RAG, Prompt Engineering, NLP, Computer Vision, LangChain, LangGraph, Hugging Face Transformers, PyTorch, Scikit-learn, FAISS, OpenCV, NLTK
- Software Engineering:** FastAPI, React, Node.js, REST APIs, API Integration, Streamlit
- Data & Databases:** NumPy, Pandas, Matplotlib, Plotly, MySQL, SQLite, MongoDB
- Cloud, DevOps & Tools:** AWS, Docker, Git, GitHub, CI/CD

WORK EXPERIENCE

CyArt

Remote

AI Engineer Intern

Sep 2025 - Dec 2025

- Engineered a concurrent Python news analytics pipeline processing 494+ headlines from 20 RSS sources, improving ingestion performance by 20%, achieving 19 headlines/sec throughput, and generating 1,877+ sentiment classifications via 3 NLP engines.
- Developed a real-time OpenCV surveillance system monitoring 4 concurrent camera streams at ~7.4 FPS, integrating 2 motion-detection algorithms and 4 integrity checks to deliver automated compromise detection and live alerting.
- Researched and benchmarked XTTS-v2 and VALL-E-X (text-to-speech models) through 15+ voice-cloning experiments, building automated evaluation pipelines that achieved 0.965 speaker similarity while assessing latency, stability, and speech quality.

Edunet Foundation

Remote

Front-End Web Developer Intern

Aug 2025 - Sep 2025

- Developed and deployed '**CineScope**', a full-stack movie discovery platform using HTML, CSS, JavaScript, Node.js, & Express, integrating the OMDb API to deliver 8 user-facing features including search, reviews, ratings, and personalized watchlists.
- Engineered a secure Express proxy architecture with robust validation and error handling, implementing 6 validation checks, 3 recovery mechanisms, and resolving 5 production-critical issues to improve application reliability and deployment readiness.

PROJECTS

Learnify AI | FastAPI • React • LangChain • FAISS • MongoDB • JWT

[GitHub](#) | [Live](#) | [Demo](#)

- Built a production-grade multimodal AI tutoring platform transforming study materials (PDFs, PPTs, and TXTs) into voice-enabled, emotion-aware learning, delivering a level-adaptive RAG pipeline with 3x faster contextual retrieval.
- Engineered swappable multi-LLM orchestration (Gemini, Groq, Ollama) with real-time DeepFace/OpenCV emotion detection and a gamified adaptive quiz engine in React, scaling across 5 difficulty tiers and 6 AI-mini-games, improving personalization by 40%.

Stratix | FastAPI • Streamlit • LangGraph • LangSmith • SQLite

[GitHub](#) | [Live](#)

- Architected an autonomous multi-agent market intelligence platform that turns a seed keyword into an SEO strategy report, using a 7-node LangGraph pipeline with a ReAct agent executing 6 tools for keyword research, competitor analysis, and trend forecasting.
- Built an LLM-as-judge evaluation layer to auto-correct unreliable research findings and SQLite checkpointing for crash-safe resumability, validated by a 173-test suite with 100% coverage on core orchestration logic.

MediScan | PyTorch • torchvision • Streamlit • PyMuPDF • BeautifulSoup4

[GitHub](#) | [Live](#) | [Demo](#)

- Developed a medical vs. non-medical image classifier, fine-tuning a ResNet18 CNN in PyTorch over 12 epochs with early stopping, achieving 100% classification accuracy (101/101) on a held-out validation set.
- Built a Streamlit and CLI dual-interface evaluation pipeline with ~102ms average inference latency, flagging low-confidence predictions for manual audit.

LEADERSHIP EXPERIENCE

Google Developer Groups on Campus

New Delhi, India

Social Media Manager & Team Lead

Sep 2024 - Aug 2025

- Led a 10-member social media team, revamping the organization's social media presence and executing data-driven content strategies, driving 65% growth in digital reach, 40% higher content efficiency, and 5+ new industry partnerships.

IEEE Student Branch

New Delhi, India

Student Coordinator

Aug 2023 - Jul 2025

- Contributed to 25+ flagship IEEE events impacting 700+ participants, boosting engagement and branch visibility by 40% and event participation by 30% through design support, hosting, and cross-functional coordination.
